FCC Master Label Requirements:

- Label size should be 4"x6".
- Labels should be placed on the outside of cardboard or shrink wrap that may otherwise obstruct the ability to view and scan.
- Master labels are required if more than one container is in a larger unit, with all container serial number barcodes tied to the master.
- Serial Number and the Customer Part Number must be scannable and human readable. It must be a unique serial number not repeating for 18 months.
- Quantity: (total of all parts on pallet).
- Barcodes need to be 3 of 9.
